

## SolidWorks Installation:

1. Launch executable: F:\install\Solidworks\2010-2011\i386\sldim\sldim.exe
2. You want to complete an individual installation.
3. It asks for the SN; 9710 0014 8144 1518 5KWF NJD4 (You may have to type this in before clicking next).
4. Warning came up that SolidWorks server was unavailable and whether to retry or to cancel and install from local server. Select cancel so just install what is available on the f:drive
5. Install SolidWorks and select new installation (if no previous version installed)
6. For options select IPS (inch, pound, seconds) and ANSI standard instead of ISO (This may or may not be an option)
7. Select 'ADD' to enter a license server name (may skip to step 8 automatically)
8. Enter server name: 25734@garfield.sdsmt.edu (Select 'OK')-Cannot copy and paste, type this in
9. Install
10. Select 'NO' for SolidWorks Customer Experience Program

You need to select 'NEXT' at a few more spots, but these are the main things
