## The Assignment for Friday, the third Friday

*If the man who turnips cries  
Cry not when his father dies,  
'T is a proof that he had rather  
Have a turnip than his father.*

*-Samuel Johnson*

We often take the time to criticize, but not the time to compliment. Here is your opportunity to improve the class, delivery of subject matter, and overall enjoyment of the course. It is important that you do so during the course duration rather than at the end of the course, so you and others may witness improvements. It's called 'continuous feedback' in engineering jargon.

- I want Dr. Abata to continue to check homework in class.
- I want Dr. Abata to collect homework at the end of the week.
- I want our class to continue to place problems on the board.
